ozheev@gmail.com | +6282227774404 | Jakarta, Indonesia | linkedin.com/fahrulrozi | fahrulrozi.github.id

PROFILE

IT Specialist with 5+ years of experience in EMR/HIS implementation, enterprise application delivery, and healthcare system analysis. Experienced in hospital workflow analysis, requirements gathering, system configuration, UAT, testing, deployment, user training, troubleshooting, and post-implementation support. Proven ability to coordinate with hospital users, clinical and operational teams, internal IT teams, and vendors to deliver effective healthcare technology solutions.

PROFESSIONAL EXPERIENCE

Bithealth, *Solution Delivery Analyst* Aug 2025 – Aug 2026 | Tangerang, Indonesia
- Analyze business and user requirements for digital healthcare solutions.
- Translate business needs into functional specifications and implementable application solutions.
- Coordinate solution delivery across requirements, development, testing, UAT, and go-live.
- Collaborate with Product, Engineering, QA, Customer Support, and business stakeholders.

JUBELIO , *Implementor Specialist* Dec 2024 – May 2025 | Jakarta, Indonesia
- Conducted onboarding and training for users and partners on omnichannel and warehouse management systems.
- Provided technical and functional support for system usage and marketplace integrations.
- Coordinated technical issue resolution with relevant internal teams.
- Conducted follow-ups and post-onboarding support to improve user adoption and system utilization.

Zi.Care

Data Analyst Aug 2023 – Nov 2024 | Jakarta, Indonesia
- Analyzed EMR data to identify trends and improve operational efficiency.
- Developed reports and dashboards for medical and management stakeholders.
- Collaborated with cross-functional teams to optimize EMR processes through data-driven solutions.
- Supported system issue resolution and healthcare improvement initiatives.

Implementor Coordinator Aug 2021 – Aug 2023 | Jakarta, Indonesia
- Led end-to-end implementation of HIS/EMR across multiple healthcare facilities.
- Analyzed hospital workflows and translated user requirements into system configurations and functional solutions.
- Coordinated system testing, UAT, deployment, go-live, and post-implementation support.
- Coordinated with hospital users, clinical teams, IT teams, and stakeholders to resolve application issues.

Implementor Specialist May 2020 – Aug 2021 | jakarta, Indonesia
- Supported EMR/HIS implementation across multiple healthcare facilities.
- Configured registration, medical records, billing, pharmacy, and laboratory modules based on hospital workflows.
- Gathered user requirements and provided user training and functional support.
- Supported troubleshooting, go-live activities, and post-implementation system stabilization.
